

# ICP-1 FILLER

DESIGNED FOR PRODUCTION | BUILT TO LAST

Australian engineered for performance, the ICP-1 features premium components, exceptional filling accuracy, and a hygienic design for quick and easy cleaning.

## FESTO DVRS-40 Rotary Valve

Industry-leading 400 N force for reliable, positive valve actuation. Custom 304 stainless steel shaft for maximum durability and corrosion resistance.

## TOOL-FREE DESIGN

Tool-free removal of all product-contact components for fast, easy disassembly, simplifying cleaning, maintenance, inspection, and sanitisation while reducing downtime.

## PREMIUM FESTO & SMC PNEUMATICS

Featuring premium FESTO and SMC pneumatic components for superior reliability, durability, and operational longevity.

## STAINLESS BASE

Heavy duty 3mm thick 304 Stainless base for strength and stability.

## 316 STAINLESS Wetted components

316 stainless steel wetted components, food-grade PETP valve, and Viton seals as standard. Engineered to meet FSANZ food hygiene requirements.

## Digital scale

Fast, accurate volume changes without recalibration. Enter the required fill volume and the integrated calculator automatically determines the correct machine setting.

## PRECISION MECHANICAL STOPS

Adjustable pneumatic and mechanical stops precisely control the filling stroke, eliminating sensor overrun and ensuring accurate, repeatable fills.

## Hardened Shaft & Bushing Design

Bosch Rexroth hardened shafts and premium USA-made bushings provide exceptional durability, reliable operation and reduced maintenance compared with traditional roller bearing systems.
